Career Objective

- Electronics and Communication Engineering candidate with a foundation in Data Structures and Algorithms(DSA), Object-Oriented Programming(OOP). Passionate about web development, writing clean code, and building scalable applications. Hands-on experience developing web applications using Java and JavaScript.

Education

- **St. Joseph's College Of Engineering, Chennai**
  Bachelor of Engineering in Electronics and Communication Engineering 2023 – 2027
  CGPA: 8.86
- **Velammal Vidyalaya, Madurai**
  HSC (Class XII): 79%

Technical Skills

- **Programming Languages:** Java, C, SQL
- **Web Technologies:** HTML5, CSS3, JavaScript (Basic)
- **Tools & Platforms:** Linux, GitHub, Power BI, Visual Studio.
- **Core Competencies:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving

Projects

- **Nephele 3.0(AI Community Robot):** 2025
  Technologies: Raspberry Pi, Embedded Systems, IoT, Sensor Integration
  Contributed to the hardware integration of an AI-enabled community robot by interfacing sensors, actuators, and embedded controllers with the software system.
  Assisted in hardware testing, debugging, and communication between embedded devices and the AI software platform.
- **Interactive Path Finder:** HTML, CSS, JavaScript 2026
  Developed a dynamic roadmap generator web application utilizing advanced DOM manipulation to visualize structured learning paths.
  Designed a responsive, mobile-friendly user interface with seamless, event-driven JavaScript interactions.
- **Bus Ticket Reservation System:** Java, OOP Concepts 2024
  Programmed a comprehensive console-based application in Java to efficiently manage seat allocations and user bookings.
  Applied core Object-Oriented Programming (OOP) concepts including inheritance, encapsulation, and robust exception-handling protocols to ensure application stability.

Experience

- **Firmware Intern (IoT)** Coimbatore, India | 2025
  Developed and optimized embedded C/C++ code for microcontroller systems to ensure seamless data acquisition and processing.
  Collaborated with senior engineers to troubleshoot complex software integration issues and debug system-level architecture.
  Implemented firmware logic and data-handling routines utilizing STMCubeIDE and Arduino development environments.

Achievements & Certifications

- Solved 500+ algorithmic problem sets on Skillrack and 100+ logic problems on LeetCode.
- Designed and developed a collaborative Whiteboard web application using HTML, CSS, and JS during a 24-hour inter-college hackathon.
- Certifications: HTML, CSS, JS (Coursera); Cloud Edge ML & Introduction to OS (NPTEL).
